The following investigation was conducted on November 10, 1983, by SA NANCY N. UNDERWOOD:

Attempts to locate RON LEVIN at his place of listed employment were negative. He listed his office as 9701 Wilshire Boulevard, Suite 850, Beverly Hills, California. That location is inside the Mitsui Manufacturers Bank on the eighth floor. The building directory indicated that numerous businesses were located in Suite 850. After entering the eighth floor area, a switchboard area was observed wherein were located numerous mail boxes. The individual operating the switchboard advised that LEVIN rarely came to that location and that he usually called in for messages.
